

Varun Petekar

Dombivli, India 421202 | +919324342207 | varunpetekar28@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Bachelor of Science in Information Technology, Pragati College of Arts & Commerce, Mumbai University 07/ 2021–04/2023
HSC, Commerce, S. H. Jhondhale Polytechnic, Mumbai University 08/2019– 04/2021
SSC, Swami Vivekanand Vidyamandir, Mumbai University 06/2009– 05/2019

SKILLS

Data & Programming Languages: SQL, Python (Pandas, NumPy, Matplotlib, PyInstaller), API Development (REST APIs, Third-party API Integration)

Databases: MySQL, PostgreSQL, Firebase

Cloud Technologies: GCP, Azure, Databricks

BI/Analytics Tools: MS Excel, Tableau, Google Analytics 4, VBA Macros, Power BI, BigQuery, GTM, Google Search Console, SEO Analytics, Google Business Profile.

AI & Automation Tools: LangChain, FAISS, Google Gemini API, Selenium, Web Scraping, Ollama, Mistral, Deepseek, n8n, LangGraph, Airia, LangFlow

IDE & Tools: Git, Jupyter Notebook, PyCharm, Visual Studio Code, MySQL Workbench, SSMS, Azure Data Studio, Cursor, Windsurf, Antigravity

WORK EXPERIENCE

Execiva, India, Data Analyst 08/2024 – Present

- Manage end-to-end data analytics, web scraping, API development, and database operations, processing 500K+ records/month using Python, SQL, and Selenium.
- Build and maintain Power BI dashboards and cloud analytics pipelines on BigQuery and Databricks, supporting 10+ active US clients with real-time insights.
- *Oversee backend systems, CRM workflows (HubSpot, Concord), and digital analytics, improving reporting efficiency by ~60% through automation, SEO tracking, and optimized data flows.*

Pacecon Technosys Pvt Ltd, India, Application Developer Intern 05/2024 – 08/2024

- Led full-stack development, building and hosting Python APIs solo, supporting 100% of frontend-backend integration.
- Fixed 15+ critical data bugs and optimized cross-platform handling, improving app stability by 40%.
- Designed data models and integrated 3 third-party APIs, boosting data retrieval speed by 50% and cutting manual work by 25%.

PROJECTS

AI Lead Scraping & Proposal Automation

- Built an n8n automation to scrape 50,000+ leads/month from platforms like Upwork bypassing Cloudflare.
- Automatically generated proposals based on lead data, reducing manual work by 90%, with only human intervention for sending.
- Improved client lead conversion by 60% by delivering timely and accurate proposals at scale.

Spotify Music Metadata, Playcount, Credits And Lyrics Scraper

- Scraped 800M+ songs, extracting metadata, playcount, lyrics and credits automatically using track and artist URLs.
- Fully automated the process to capture entire artist catalogs and associated song details, improving data accuracy by 70%.
- Enabled large-scale analytics for 200+ artists and 5M+ tracks monthly, supporting actionable insights for clients.

Cloud-Powered Power BI Dashboard

- Built dashboards connected to BigQuery and PostgreSQL, visualizing millions of rows of client data in real-time.
- Made dashboards accessible via live web URL, improving reporting speed by 40% and usability for 50+ clients.
- Optimized queries and visuals for high performance, reducing report loading time by 30%.

AI-Driven Lead Intelligence & Outreach Automation (n8n + Apify)

- Built an end-to-end AI automation using n8n and Apify to scrape high-volume B2B lead data with 40+ structured attributes including company, revenue, tech stack, and decision-maker details.
- Developed an AI agent to analyze leads and auto-generate technical opportunity reports (SEO, AI automation, dashboards, analytics) tailored to each business.

- *Implemented autonomous AI agents for calling, personalized cold emailing, and interest detection, auto-routing qualified leads to GCO with zero manual intervention.*
